

A Trusted, Highly-Configurable Document Management System

ACE Docs® is a versatile, workflow-based Document Management System designed to simplify the way you handle documents across your business. Part of the ACE® platform, ACE Docs® offers real-time tracking, management, and reporting of all document-related activities, helping you maintain compliance and boost productivity. With features like advanced search, customizable workflows, and seamless integration with tools such as ACE LMS®, ACE Docs® ensures a unified approach to managing the entire document lifecycle—from creation to archiving. Experience greater efficiency and control with a system built to adapt to your unique business processes.

Key Features

Collaborative Authoring

Allow users to create, edit, and collaborate on documents directly within familiar Office applications while keeping all files securely managed in ACE. This integration ensures seamless version control, real-time collaboration, and compliance tracking without leaving the Office 365 environment.

Seamless Integration with ACE LMS®

Leverage the power of ACE Docs® by pulling documents directly into ACE LMS® trainings. This integrated solution streamlines your workflow and gives you full control over the document training process.

An End-to-End Platform

ACE® provides an all-in-one solution connecting your quality processes in one platform. ACE Docs® covers document management but is also utilized throughout the system for complete control and visibility over quality management.

Intuitive Experience

Boost user engagement and productivity with an intuitive, easy-to-navigate platform. Designed for a seamless experience, ACE® simplifies daily tasks, and reduces the learning curve, allowing your team to focus on what matters most.

Template Documents

A built-in document template allows users to create, edit, and manage documents entirely within the system, eliminating the need for external programs like Word. This ensures the entire document lifecycle, from creation to approval and archiving, is seamlessly managed within ACE Docs®.

Advanced Search

Enable users to quickly locate documents using various filters, keywords, and metadata, significantly improving efficiency. This powerful functionality allows for precise searches across extensive document libraries, ensuring that users can find the information they need when they need it.

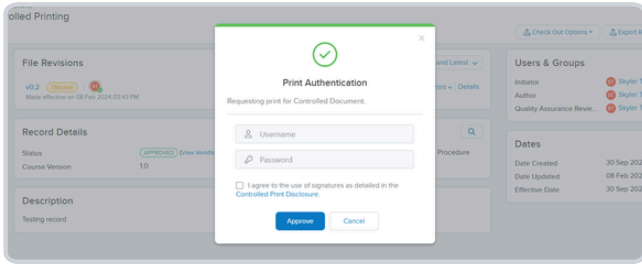

API Integration

ACE® supports seamless integration with other software through robust APIs, enabling smooth data exchange and enhancing system interoperability.

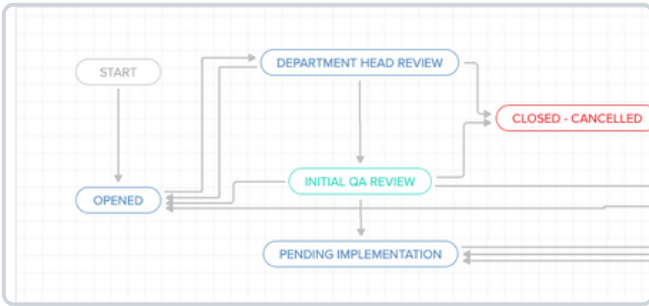

Advanced Security and Compliance

Safeguard your data with ACE® enterprise-grade security features. We meet stringent standards such as GDPR and SOC 2, and support AES 256-bit encryption for data at rest and in transit.

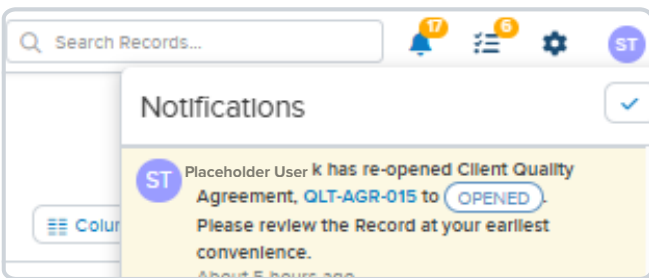

Controlled Printing

Control user's print permissions for each document. Allow for password protection on any document printing within ACE®.

Flexible workflows

Utilize our fully customizable workflows and create a document workflow specific to your company's needs.

Real-time Notifications

Receive instant alerts on the current state of any record you are associated with. Notifications can be created for periodic reviews, record creation, deletion, etc.

✓ Always Follow GXP

Quickly establish good quality practices and facilitate 21 CFR Part 11, Annex 11, GMP, and other regulatory compliance

✓ Collaboration and Organization

Share and send documents to other users within the system for easy access and visibility.
